PROJECTS, PLANS, AND OTHER ACTIONS INCORPORATED INTO THE COMPREHENSIVE PLAN

The Commission has been incorporating projects, plans, and other actions into its Comprehensive Plan since 1973. Section 14.1 of the Compact states that the Plan shall include public and private projects and facilities “which are required, in the judgment of the commission, for optimum planning, development, conservation, utilization, management, and control of the water resources of the basin to meet present and future needs.” In accordance with this authority, the following projects, plans, policies, programs, and regulations are included in the Comprehensive Plan.

Table 2-1 lists federal, state, and private water resource projects. Table 2-2 lists plans, policies, programs, and regulations.

Finally, Table 2-3 lists the numerous water use facilities approved under the Commission’s regulatory program. These facilities include many individual projects since some facilities have more than one project as indicated by the multiple approvals listed in Table 2-3. A brief description of the facilities is included under the NAICS (North American Industry Classification System) Title column. Project approval remains in effect until the expiration date unless: (1) the withdrawal, diversion or consumptive use of water has not commenced within three years of the approval; (2) the withdrawal, diversion or consumptive use of water is discontinued for five years; or (3) the project is abandoned. Extension of the project approval beyond the expiration date requires an application be submitted by the project sponsor and it be approved by the Commission.
