### Section 4. Aquifer Testing

The constant-rate aquifer testing required by Commission Regulation 18 CFR § 806.12 for groundwater withdrawals was completed with prior Commission approval. A 72-hour, constant-rate aquifer test of the Meshoppen Pizza Well was conducted from October 5 through 8, 2009, pumping at an average rate of 150 gallons per minute (gpm). In addition to the historical testing data, the project sponsor provided an evaluation of historical withdrawal data demonstrating use at the requested rate and groundwater elevation data collected during operation of the well under previous Commission approvals.

Commission staff determined that the withdrawal from the Meshoppen Pizza Well at the requested withdrawal rate should not cause permanent loss of aquifer storage, render competing supplies unreliable, or cause adverse impacts to the water resources of the basin, subject to the conditions set forth below.
