The purpose of this well is to provide a potable and palatable water to the consumers in the Village of Windsor and to the Windsor Central High School. The well is also a supplier of fire protection throughout the entire Town of Windsor. The well has been in existence since 1973 and has and will operate the same as it always has. At this time we are working with groundwater science to determine if we need to apply for an aquifer waiver or if the testing needs to be done.
