Requested Surface Water Withdrawal Quantity

Projected Design Year: 2034

Existing Withdrawal Quantity: 5.76(mgd)

Requested Increase in Withdrawal Quantity: 0(mgd)

Maximum Instantaneous Withdrawal Rate: 5600(gpm)

Estimated Daily Operation: 24(hours/day)

Requested Consumptive Use Quantity - Yes

Existing Consumptive Use: 1.267(mgd)

Requested Increase in Consumptive Use: 0(gpm)

Pre-Compact/Grandfathered CU: 0

Facility Location

Street Address: 344 Elk Mountain Road

State: PA

County: Susquehanna

Municipality: Herrick Township

Zip Code: 18470

Surface Water Withdrawal Source Information

Source Name: Un-named tributary to East branch of Tunkhannock

Source Type: pondThe additional pond will be used for storage and filled the same as the current "new" pond.

Subbasin: Middle Susquehanna

Elk Mountain Ski Resort, Inc. – Project Description

The proposed modification application (SRBC Pending No. 2019-057) of June 19, 2019, does not increase the total amount of water withdrawal that is currently approved. The proposed application will only convert the existing peak-day withdrawal requirements to a 30-day average withdrawal requirement of the same 5.760 mgd. There will be no change to the existing weir configuration and no proposed changes to the water intake structure associated with this application. The proposal for the 30-day average withdrawal will better serve the needs of Elk Mountain due to fluctuations in weather conditions throughout the 30-day period.
