Requested Surface Water Withdrawal Quantity

Projected Design Year: 2027

Existing Withdrawal Quantity: 0.715(mgd)

Requested Withdrawal Quantity: 0.715(mgd)

Maximum Instantaneous Withdrawal Rate: 700(gpm)

Estimated Daily Operation: 24(hours/day)

Requested Consumptive Use Quantity - No

Existing Consumptive Use: 0(mgd)

Requested Consumptive Use: 0(gpm)

Pre-Compact/Grandfathered CU: 0

Facility Location

Street Address: PA 706

State: PA

County: Susquehanna

Municipality: Rush Township

Zip Code: 18828

Surface Water Withdrawal Source Information

Source Name: Wyalusing Creek

Source Type: stream

Subbasin: Middle Susquehanna

PROJECT FACILITY DESCRIPTION

Wyalusing Creek – Rush Surface Water Withdrawal Application Chesapeake Appalachia, LLC

Chesapeake Appalachia, LLC (Chesapeake) is a natural gas exploration and development company requesting renewal for an existing surface water withdrawal (Rush) from the Wyalusing Creek at a location off PA 706 in Rush Township, Susquehanna County, Pennsylvania. The project is an existing and operating surface water withdrawal with an existing distribution system, previously approved under SRBC Docket Nos. 20121209 and 20170605. Water is withdrawn via a primary buried intake, flows through the screen to a submersible pump, and then to a series of five 16,800-gallon storage tanks. Water flows from the storage tanks to a series of truck filling hydrants.

Chesapeake plans to continue operation of the withdrawal at its previously approved rate of 0.715 million gallons per day (mgd) with a maximum instantaneous withdrawal rate of 700 gallons per minute (gpm). Water will be used for activities related to natural gas exploration and production including well development, well drilling, well completion, and other site related activities on an as-needed basis. The Wyalusing - Rush water withdrawal will be used to supplement development operations throughout Bradford and Susquehanna Counties.
